# reading 2018 aps data set
aps <- read.csv("/Users/ibrahimibrahim/Documents/Ryerson/820/data set/2018-aps-employee-census-dataset.

# when I first examined the dataset, I found out there were no NAs and all unaswered questions
# were categorized as " ", so I modified the read.csv file to regard " " as NA using na.strings=" "
# all variables are factors so I chose stringAsFators=True

# overview
#head(aps)
#tail(aps)
#str(aps)
#summary(aps)

# renaming variables and creating a new data frame with reduced number of variables

# reading new column names from a csv file
column_names_1 <- read.csv("/Users/ibrahimibrahim/Documents/Ryerson/820/data set/column_names_2018.csv"

aps_new_column_names <- aps
names(aps_new_column_names)[1:301] <- c(column_names_1$new.column.name)
aps_reduced <- select(aps_new_column_names, -contains("disregarded"))

# On page 1 of instructions on how to complete the census, employees were told:
# 1- You are then free to skip and not answer any other questions that you may not want to answer.
# 2- If you cannot answer a question, please feel free to leave it blank.

# a few questions also had the option of answering with "I do not know" which could be
# one of the motivations for skipping a question - so "I do not know" answers cannot be
# treated as unique vs. skipped questions (these answers are likely a subset of skipped questions)
# therefore after initial exploration, "I do not know" answers will be treated the same
# way as skipped questions

# Skippig questions was allowed in survey, so will check for missing values
